

DUAL DRIVE BOLTER[®]

FEATURES AND BENEFITS

- Revolutionary design of the Dual-Drive Bolter Steel isolates the threads from bending forces created by bit deflection while drilling, greatly reducing the stress on threads.
- Forces are transmitted more effectively to the face of the bit through the skirt and body of the bit, therefore reducing exposure of the threads to the potentially “damaging percussive forces”.
- Dirt and rock are tough on threads; our unique design protects the threaded connection from exposure to debris while exiting the hole, this extends thread life plus reduces mat snags when bolting.
- Our customers have realized 20-50% longer steel life compared to other products in the market when using the new Brunner & Lay Dual-Drive system.

DRILLING ACCESSORIES

PART TYPE	DESCRIPTION	PART NUMBER
STEEL*	8'2" 100RDD/125R	K2098AC314
	8'6" 100RDD/112R	K2102AC322
	9'2" 100RDD/125R	K2110AC305
	6'9" 100RDD/125R	K2081A0320
BITS (CONTROLLED DIA.)	34mm 100R EXP	S03410316
	37mm 100R EXP	S03710308
	37MM 100R AK	S03710M
	39MM 100R AK	S03910M
BITS	33MM 100R MC	S03310M
	1-3/8" 100R AK	S1210M
	1-3/4" AHBB 100R	S1710B0
	1-7/8" AHBB 100R	S1910B0

*Other lengths available upon request.

Made in U.S.A.

DUAL DRIVE BOLTER[®]

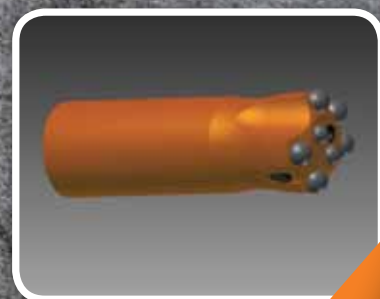

Strengthen Drill String
Prolong Steel Life
Decrease Downtime
Increase Productivity
Reduce Mat Snags

**Brunner
& Lay**

"Quality First" since 1882.

Brunner & Lay manufactures the finest tools available in the world today.

With over 130 years perfecting our manufacturing methods and our production processes you are guaranteed the best possible products.
