

Brunner & Lay

135th Anniversary

Earlier this year we celebrated our 135th Anniversary with an Open House for our employees and their families, and the local community.

Who we are

F. Michael Brunner has been the President of the company since 1988, the fourth generation of the family to assume the role. Old school values and hard work drive him to keep B&L product quality high and 100% American made.

"American Made" Tools

Brunner and Lay Tools are manufactured completely in our state of the art facilities in Springdale Arkansas. We use only the highest grade steel and source that steel from the most reliable and reputable mills in North America and Europe. Our employees are the very best at their crafts and many have been employed with us for most of their adult lives. They take great pride in their work and the products that they supply to the workforce of our great nation. Many of our competitors in the industry are sourcing raw steel, forgings or even the finished goods that they offer from countries that provide inferior products for less money. As shown in the above photo some tools are plainly stamped, many are not, and in side by side testing our "American Made" Tools out perform them in every way.

Truck Wraps

In a bold undertaking we have begun the process of outfitting our over the road crew with new trucks covered in art that represents our various product lines and color scheme.
