

# Brunner & Lay

ASK ABOUT OUR  
SHOW SPECIAL  
THRU MARCH 31ST.

## We moved!

We have moved into a brand new facility in Chicago. 300 Evergreen Street Bensenville IL 60106

## Who we are

Mike Williams is the latest addition to the Brunner & Lay family. He will assume the role of

Director of Sales for the United States. Look for Mike at the various trade shows B&L will be attending as well as traveling across the country.

## “QuickSand” Bits

Brunner and Lay is launching a new bit model designated Q0 for drifting and tunneling in soft rock formations. The new model is designed in 9 and 12 button configurations based upon diameter with increased insert profile to aid formation of large chips and clearance for flushing. This helps the bit to penetrate deeper into the rock with each hammer stroke. The improvements in flushing capacity made through focus of flush media and larger chip channels aid removal of the cuttings at the bit face. During tests in sandstone and limestone formations in North America the new Q0 bits have realized as much as 40% decrease in bit consumption with much higher penetration rates.

## Ask Rocky:

What is an asphalt cutter?

Asphalt cutters are breaker tools specially designed so the full width of the blade can be used for cutting the desired material.
