Happenings

Valued customers shooting at the skeet and trap fields with the B&L sales team.

Who we are

David Bullifent is the General Manager for all of the Brunner & Lay operations.

Originally from England he has been affiliated with the company for almost 40 years.

Rivet Buster Revolutions

Brunner and Lay is launching two new Rivet Buster tools for use in your extra heavy duty 11X Hammers. Originally designed to cut rivets off metal structures, these lightweight handheld tools are now used for a variety of demolition and job site clean up. Their light weight and high impact energy make them one of the most efficient tools on the market.

The new **L27B00** - Bushing Tool can be used for leveling and roughing up uneven floors or walls prior to resurfacing.

The **L32B12** - 2" Scaling Chisel is a versatile tool that can be used for cutting asphalt, scoring concrete, or even breaking practices where the substance is too soft for moil point work.

Ask Rocky:

Which bit is best for drilling small holes quickly?

Taper button bits are best for faster penetration and improved flushing which increases overall performance.
